#### **DETAILED ACTION**

(1). Applicants' Remarks filed on 10/09/2007 has been received.

However, the rejections of claims 1-13 in prior Office Action dated 06/05/2007 are sustained.

## Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

- (2). Claims 1-5, 7-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sampson et al (US03892714) for the same rationale set forth in prior Office Action dated 06/05/2007.
- (3). Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sampson et al (US03892714) in view of Thomas et al (US06130286A) for the same rationale recited in prior Office Action dated 06/05/2007.

## Response to Arguments

Applicant's arguments filed on 10/09/2007 have been fully considered but they are not persuasive.

Applicants argue that reference Sampson et al (US03892714) disclose the range of hydroxyl values from at least 20 and below 250 is very broad because applicants teach the KOH range of from 160 to 200 (Remarks, page 5). However, the upper bound of KOH values between applicants invention and that of prior art is only 50, it is therefore, no very broad to one of ordinary skills in the art. Applicants' must show unexpected results or criticality of factual evidence in order to overcome the rejections.

Applicants argue that reference Thomas et al (US06130286A) teach only optionally in combination with cyclo-alkyl (meth)acrylates (Remarks, page 6). In reviewing the teaching of Thomas et al (US06130286A), it recites: Monomer group (ii), typical acrylates may include alkyl, cycloalkyl or aryl acrylates and methacrylates having 2 to 6 carbon atoms in esterifying group. Examples of particularly useful acrylate monomers are butyl methacrylate, methyl

Page 3

methacrylate, and n-butyl methacrylate. Other monomers that may be considered useful include lauryl methacrylate, 2-ethylhexyl methacrylate, isobornyl methacrylate and cyclohexyl methacrylate (Col. 5, line 64 – Col. 6, line 8). Therefore, it is not optional to include cycloalkyl (meth)acrylate.

#### Conclusion

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ives Wu whose telephone number is 571-272-4245. The examiner can normally be reached on 8:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on 571-272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
